

Description

EnkamatPlus is a three-dimensional heavy duty Enkamat core heat-bonded to an eight ounce polyester geotextile fabric. The Enkamat core is produced from nylon monofilaments fused together at their intersections. The 95% open structure of the nylon core allows water and other liquids to drain through to the turf below while providing a tough, walkable surface for players and coaches. Enkamat Plus has a Class A Flame Spread rating per ASTM E84.

Features and Benefits

- Rolls out and rolls up in no time flat
- Reusable time and again
- Protects natural turf from being destroyed during games
- Water flows through and does not build up on the surface
- Provides air space between the turf and foot traffic
- Easy to store

Recommended Applications

- Athletic Fields
- Football & Soccer Sideline Matting
- Concert Venues
- Batting Cage & Fungo Mat
- Replaces Old-Style Tarps & Polyester Matting
